

# Lab Report Analysis

Report Type: CBC (Complete Blood Count)

Lab: DR. N.M. KAZI MEDICAL LABORATORY • Referring Doctor: SELF • Report Date: 11/8/2025

Patient: [REDACTED]      Age: Male      Gender: 5by      Date: Not mentioned

## Test Results

| Test            | Result | Unit          | Reference     | Status |
|-----------------|--------|---------------|---------------|--------|
| WBC Total Count | 10.90  | /Cumm         | 4000-11000    | Normal |
| Neutrophils     | 65     | %             | 40-75         | Normal |
| Lymphocyte      | 30     | %             | 20-45         | Normal |
| Eosinophil      | 03     | %             | 1-6           | Normal |
| Monocyte        | 02     | %             | 1-6           | Normal |
| Basophil        | 00     | %             | 0-1           | Normal |
| RBC COUNT       | 5.53   | Mill/cumm     | 4.2-5.8       | Normal |
| Haemoglobin %   | 14.8   | Gms%          | 12-17         | Normal |
| PCV             | 43.6   | %             | 36-48         | Normal |
| MCV             | 79     | Fl            | 78-96         | Normal |
| MCH             | 26.8   | Pg            | 26-34         | Normal |
| MCHC            | 34.0   | %             | 31-35         | Normal |
| Platelet Count  | 2.63   | Lakh/cum<br>m | 150000-450000 | Normal |

## Medical Interpretation

This is a Complete Blood Count (CBC) report that provides a comprehensive overview of your blood cells. I'm pleased to inform you that all your blood parameters are within normal reference ranges, which is reassuring.

### WBC Total Count

Your White Blood Cell count is 10.90 /Cumm, which falls within the normal range of 4000-11000. This indicates that your immune system is functioning properly and there are no signs of infection or immune disorders at this time.

### Differential Count (Neutrophils, Lymphocytes, Eosinophils, Monocytes, Basophils)

All your white blood cell types are present in normal proportions: Neutrophils 65% (40-75%), Lymphocytes 30% (20-45%), Eosinophils 3% (1-6%), Monocytes 2% (1-6%), and Basophils 0% (0-1%). This balanced distribution suggests healthy immune function with no allergic reactions or parasitic infections.

### RBC Count

Your Red Blood Cell count is 5.53 Mill/cumm, which is normal (reference range: 4.2-5.8). This indicates adequate production of red blood cells by your bone marrow and good oxygen-carrying capacity.

**Haemoglobin**

Your Haemoglobin level is 14.8 Gms%, which is excellent and within the normal range of 12-17 Gms%. This means your blood has sufficient oxygen-carrying capacity and you are not anemic.

**PCV (Packed Cell Volume)**

Your PCV is 43.6%, which is normal (reference range: 36-48%). This represents the proportion of blood volume occupied by red blood cells and confirms adequate red cell mass.

**MCV (Mean Corpuscular Volume)**

Your MCV is 79 fL, which is normal (reference range: 78-96 fL). This indicates that your red blood cells are of normal size, ruling out conditions like iron deficiency or vitamin B12 deficiency.

**MCH (Mean Corpuscular Hemoglobin)**

Your MCH is 26.8 Pg, which is normal (reference range: 26-34 Pg). This shows that each red blood cell contains an appropriate amount of hemoglobin.

**MCHC (Mean Corpuscular Hemoglobin Concentration)**

Your MCHC is 34.0%, which is normal (reference range: 31-35%). This indicates proper hemoglobin concentration within your red blood cells.

**Platelet Count**

Your Platelet count is 2.63 Lakh/cumm (263,000), which is well within the normal range of 150,000-450,000. This means your blood clotting function is normal and there is no risk of bleeding or clotting disorders.

**General Advice & Next Steps**

Your Complete Blood Count report shows excellent results with all parameters within normal limits. This suggests good overall health with no signs of anemia, infection, or blood disorders. Continue maintaining a healthy lifestyle with a balanced diet rich in iron, vitamins, and minerals. Stay well-hydrated, exercise regularly, and get adequate sleep. If you were experiencing any symptoms that prompted this test, please discuss them with your doctor for further evaluation. Routine health check-ups are recommended annually or as advised by your healthcare provider.
